SKILLS

- Strong knowledge of testing theory
- Knowledge and using of test design techiqes
- Basic knowledge of HTML and CSS
- Web/Mobile/Desktop testing
- Black/Grey/Whitebox testing
- Tools: Jira, TestRail, Git/GitHub, devTools
- Developing of testing documentation
- Knowledge of SDLC, STLC, Bug life cycle, Waterfall, Agile concepts knowledge (Scrum, Kanban)
- Experience with VirtualBox
- Experience with SQL

EDUCATION

QA Course IT Step
Manual QA
2024-2025

Ukrainian State University of Railway Transport
Bachelor's degree in Specialized Computer Systems
2016-2020

PROFILE

I am a QA Manual Testing Engineer. I specialize in mobile and web testing. My skills include creating and executing tests, setting up test environments, detecting and documenting bug reports, and performing smoke and regression testing. I successfully use TestRail and Jira to manage testing processes effectively. I can professionally detect and write clear bug reports and effectively use different types of testing. I have also used white box and black box testing, where I understood the software's internal architecture.

EXPERIENCE

Projects:

🌐 **Web: "Testing tools"**

- Creation and support of test documentation (checklists, test cases, bug reports, test plan, RTM)
- Development of test cases using test design techniques
- Development of project decomposition in TestRail
- Development and execution of test runs of test cases in TestRail
- Creating bug reports in Jira
- Installation of Jira and TestRail integration
- Participation in Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective meetings

📱 Mobile: "Evernote"

- Creation and support of test documentation (checklists, test cases, bug reports, test plan, RTM)
- Development of test cases using test design techniques
- Development of project decomposition in TestRail
- Development and execution of test runs of test cases in TestRail
- Creating bug reports in Jira
- Installation of Jira and TestRail integration
- Participation in Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective meetings

🖥 Desktop: "Catch me if you can Demo"

- Creation and support of test documentation (checklists, test cases, bug reports, test plan, RTM)
- Development of test cases using test design techniques
- Development of project decomposition in TestRail
- Development and execution of test runs of test cases in TestRail
- Creating bug reports in Jira
- Installation of Jira and TestRail integration
- Participation in Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective meetings
