# IT STEP Academy

## Manual QA course

### Web testing:

**Projects** - Testing Tools, Amazon, Forbes, Rozetka, Ukr.net, Youtube, Globalives, BERN, YouCart, Lumos, Okwine, Stellarium, Demoblaze, UserTesting, Energy Telecom, Buggy Cars Rating, Bato

- Creation and support of test documentation (checklists, test cases, bug reports, test plan, RTM)
- Development of test cases using test design techniques
- Development of project decomposition in TestRail
- Development and execution of test runs of test cases in TestRail
- Creating bug reports in Jira
- Installation of Jira and TestRail integration
- Participation in Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective meetings
- L10n & i18n testing
- UI\UX testing
- Using devTools for testing
- Ad-Hoc & Exploratory testing
- Smoke\Sanity\Retest\Regression testing
- Cross-browser testing

### Desktop testing:

**Projects** - Catch me if you can (DEMO)

- Creation and support of test documentation (checklists, test cases, bug reports, test plan, RTM)
- Development of test cases using test design techniques
- Development and execution of test runs of test cases in TestRail
- Creating bug reports in Jira
- Installation of Jira and TestRail integration
- Participation in Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective meetings
- UI\UX testing
- Ad-Hoc & Exploratory testing
- Testing applications at different screen resolutions
- Install\Uninstall testing

### Mobile testing:

**Projects** - Evernote, IMDb

- Creation and support of test documentation (checklists, test cases, bug reports, test plan, RTM)
- Development of test cases using test design techniques
- Development and execution of test runs of test cases in TestRail
- Creating bug reports in Jira
- Installation of Jira and TestRail integration
- Participation in Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective meetings
- Interruption testing
- UI\UX testing
- Cross-platform testing
- Ad-Hoc & Exploratory testing
- Testing applications in different screen positions
- Install\Uninstall testing
- Application Performance Evaluation
